

## Registered Care Managers Award

Helping you demonstrate achievement in Care to national standards

### Introduction

The programme incorporates e-Learning with a mentor, a residential workshop, an assessment centre and business references to take you through the qualification to achieve the Registered Care Manager Award – a national target that care centre managers need to achieve as a licence to practice.

The assessment method uses a technique called the Professional Discussion where assessors observe workplace competence.

### Course Structure / Assessment

The Registered Care Managers Award covers four core Units:

- Unit 1: Diversity of People (Care Unit)
- Unit 2: Managing a Service (Care Unit)
- Unit 3: Managing Finance
- Unit 4: Managing People

You then have to complete four additional Units where you choose an elective subject. For instance for Unit 6 learners can choose to complete one of the following electives:

- Develop Teams and Individuals to Enhance Performance
- Create, Maintain and Develop Working Environment
- Select Personnel for Activities

You will be assigned two dedicated Assessors, one for Care and the other for the Management elements of the programme. You will be visited during the programme to assess your performance. The programme can typically take 18 months to complete.

### Learning Materials

e-assessment-4u partners with AdVal KeyKnowledge to make part of the learning available using e-Learning.

The materials are an electronic resource to support the management elements of the **Registered Care Manager Award**. The e-Learning is mapped to the qualification and uses video scenarios, interactive questions, case studies and exercises.

A residential workshop is offered throughout the country to cohorts of 8 or more to cover the care elements of the programme.

### Key benefits

- Dedicated Care and Management Assessors throughout the programme
- Professional Discussion Method of assessment – reduces the need to build portfolios
- Access to an interactive and enriched learning environment
- Learn anytime anywhere - fits into busy lifestyles
- Directly experience management skills and roles in a real environment through the power of video
- Analyse your own skills - self exploratory learning – links, information sections, case studies, questionnaires, links and exercises
- Learn from the best by having access to Best Practice Experts and Key Thinkers

### Timetable

You can start at anytime. Once e-assessment-4u has received and approved your Learner Profile form, you are taken through an Induction, given a Handbook, learning materials (if selected) and introduced to your Assessor from e-assessment-4u.
